PHILOSOPHICAL MAGAZINE

Editor

Professor E. A. Davis — Department of Physics, University of Leicester, U.K.

Associate Editors

Dr S. R. Elliott — Department of Physical Chemistry, University of Cambridge, U.K.

Professor A. J. Forty — Department of Physics, University of Warwick, U.K.

Dr M. J. Goringe — Department of Metallurgy and Science of Materials, University of Oxford, U.K.

Dr P. M. Hazzledine — Department of Metallurgy and Science of Materials, University of Oxford, U.K.

Regional Editors

Dr D. J. H. Cockayne — Electron Microscope Unit, University of Sydney, Australia

Professor C. Domb — Department of Physics, Bar-Ilan University, Israel

Dr M. Duesbury — Division of Physics, National Research Council, Canada

Professor F. Hensel — Fach Physikalische Chemie, Philipps-Universität Marburg, F.R. Germany

Dr M. Kléman — Laboratoire de Physique des Solides, Université de Paris-Sud, France

Professor K. Morigaki — Institute of Solid State Physics, University of Tokyo, Japan

Dr C. Schlenker — Laboratoire d'Études des Propriétés Électroniques des Solides, CNRS-Grenoble, France

Professor A. Seeger — Institut für Physik, Max-Planck-Institut für Metallforschung, Stuttgart, F.R. Germany

Dr R. A. Street — Palo Alto Research Center, Xerox Corporation, U.S.A.

Professor U. Valdrè — Dipartimento di Fisica, Università di Bologna, Italy

Consultant Editor

Professor Sir Nevill Mott — Cavendish Laboratory, University of Cambridge, U.K.

Book Review Editor

Dr E. Marseglia — Cavendish Laboratory, University of Cambridge, U.K.

Subscription Information

Published monthly
Annual subscription 1986 £282 DM 1128 US $620
ISSN 0141-8610

Dollar rates apply to USA, Canada and Mexico.
Deutschmark rates to FR Germany.
Sterling rates apply to the UK and all other areas.

All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada and Mexico, India and Australasia. Subscriptions are entered on an annual basis, i.e. from January to December. Payment may be made by sterling cheque, dollar cheque, international money order or National Giro, or by credit card (AMEX, VISA, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributors:

Australia	R. Hill & Son Ltd, 117 Wellington Street, Windsor, Victoria 3181.
India	Universal Subscription Agency Pvt. Ltd, 101–102 Community Centre, Malviya Nagar Extn Post Bag No. 8, Saket, New Delhi 110017.
Japan	Kinokuniya Company Ltd, Journal Department, PO Box 55 Chitose, Tokyo 156.
New Zealand	R. Hill & Son Ltd, Private Bag, Newmarket, Auckland 1.
USA, Canada and Mexico	Taylor & Francis Inc., 242 Cherry Street, Philadelphia, Pennsylvania 19106–1906.
UK and all other territories	Taylor & Francis Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR.

Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Second class postage paid at Jamaica, New York 11431. US Postmaster: Send address changes to *Philosophical Magazine*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003.

Published by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK. Printed by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK.

CONTENTS OF VOL. 52 Nos 1–6

NUMBER 1—JULY

PART A

Letters Section: PAGE

Recording diffuse X-ray reflections with continuous synchrotron radiation. An application to Type 1a diamond
By A. R. LANG, G. KOWALSKI, A. P. W. MAKEPEACE and M. MOORE.. L1

Weak-beam study of extension of jogs along ⟨112⟩ in f.c.c. alloys
By H. SAKA, S. SUGAWARA, T. IMURA and J. WATANABÉ L7

Relaxed vacancy formation and surface energies in b.c.c. transition metals
By C. C. MATTHAI and D. J. BACON..... 1

Plasticité de la silice amorphe de part et d'autre de la transition vitreuse
Par P. DONNADIEU, O. JAOUL et M. KLÉMAN 5

Superlattice formation and faulted structures in r.f.-sputtered ZnO
By B. BELMEKKI and M. S. RAVEN 19

Fault energies in ordered and disordered Ni_3Fe
By A. KORNER and H. P. KARNTHALER 29

A model for the different crazing behaviour of amorphous polymer glasses
By G. A. KARDOMATEAS and I. V. YANNAS..... 39

Lattice imaging analysis of Σ3 coincidence-site-lattice boundaries in gold
By H. ICHINOSE, Y. ISHIDA, N. BABA and K. KANAYA..... 51

A theoretical study of vacancy–impurity association and of defect aggregation processes in divalently-doped silver halide crystals
By N. M. BANNON, J. CORISH and P. W. M. JACOBS..... 61

Multilayer stacking faults with zero total displacement vector
By V. PAIDAR 73

Structure du coeur des dislocations vis $\frac{1}{3}\langle 11\bar{2}0\rangle$ dans le titane
Par B. LEGRAND..... 83

Dislocation loops in elastically anisotropic materials. II. Formation and equilibrium shapes of vacancy loops in β'-brass
By A. J. MORTON 99

Effects of impurities on the kinetic behaviour of point defects in electron-irradiated β-Nb–3·1 wt%Zr alloy
By K. NAKAI, C. KINOSHITA and S. KITAJIMA..... 115

PAGE

Computer simulation of high-energy electron scattering by non-periodic objects. The real space patching method as an alternative to the periodic continuation technique
By W. COENE, D. VAN DYCK, G. VAN TENDELOO and J. VAN LANDUYT 127

PART B

Letters Section:

Effect of electron–electron interactions on critical exponents near the metal–insulator transition
By M. KAVEH L1

Dispersion effects in the excitation of interfaces by fast-electron beams
By P. M. ECHENIQUE L9

A quasicrystal structure model for Al–Mn
By P. GUYOT and M. AUDIER L15

On the field-ion microscopy of metallic glass
By L. NORDENTOFT L21

Study of light-induced metastable defects by means of temperature-modulated space-charge-limited currents
By F. SCHAUER and J. KOČKA L25

High-resolution electron microscopy of an Al–Mn alloy exhibiting icosahedral symmetry
By K. M. KNOWLES, A. L. GREER, W. O. SAXTON and W. M. STOBBS L31

Ultrafast time-resolved photoluminescence—a probe of radiative and non-radiative processes in amorphous tetrahedral and chalcogenide semiconductors
By T. E. ORLOWSKI and B. A. WEINSTEIN 1

Universal low-frequency behaviour in the a.c. hopping conductivity of disordered systems
By S. SUMMERFIELD 9

Effects of cold-working on pinning behaviour and critical current densities in NbTi-based superconductors
By Y. YAMADA, S. MURASE, Y. KAMISADA, E. SUZUKI, H. WADA and K. TACHIKAWA 23

Gap states in phosphorus-doped amorphous silicon studied by isothermal capacitance transient spectroscopy
By H. OKUSHI 33

The photofield effect in a-Si:H thin film MOS transistors. Theory and measurement
By A. O. HARM, R. E. I. SCHROPP and J. F. VERWEY 59

PAGE

A many-frequency oscillator model for non-radiative processes in condensed media. I. Dynamics of non-radiative transitions
By S. G. CHRISTOV 71

A many-frequency oscillator model for non-radiative processes in condensed media. II. Kinetics of non-radiative transitions
By S. G. CHRISTOV 91

Book reviews 107

NUMBER 2—AUGUST
PART A

Letters Section:

Grain boundary diffusion of chromium in niobium bicrystals
By X. R. QIAN and Y. T. CHOU L13

Evidence for stacking-fault tetrahedra formed from self-interstitials in electron-irradiated silver
By G. J. HARDY and M. L. JENKINS L19

Interaction joint de grain–précipité au cours du fluage d'une solution solide sursaturée d'aluminium à 8% en poids de magnésium
Par D. HAMANA et M. BENABDOUN L25

Interlayer energy for partial slip and cleavage in muscovite
By J. OLIVES BAÑOS 145

Strain-ageing in silver chloride. III. The effect of cadmium doping on the representative curve
By M. T. SPRACKLING and H. SHALITT 153

Calculation of incommensurate diffraction intensities from disordered crystals
By G. GRZINIC 161

Vacancy cluster evolution in metals under irradiation
By M. F. WEHNER and W. G. WOLFER 189

The growth of spinel into Al_2O_3
By C. B. CARTER and H. SCHMALZRIED 207

Lattice thermal conductivity and phonon–dislocation interaction in niobium and tantalum single crystals plastically deformed at intermediate temperatures
By W. WASSERBÄCH 225

The mechanical properties of magnesium irradiated by fast neutrons at 77 K
By H. C. GONZÁLEZ and C. J. IRIART 243

Positron annihilation study of post-irradiation annealing of defects in α-irradiated molybdenum
By S. V. NAIDU, A. SEN GUPTA, R. ROY, P. SEN and R. K. BHANDARI. 255

PAGE

Diffusion coefficient in crystals with multiple jump frequencies
By S. ISHIOKA and M. KOIWA 267

Molecular dynamics studies of point and extended defects in copper
By S. W. DE LEEUW and M. DIXON 279

PART B

Letters Section:

Confined electron states associated with secondary X and L conduction band minima of GaAs–$Ga_{1-x}Al_xAs$ (001) quantum-well and sawtooth superlattices
By K. B. WONG, M. A. GELL, D. NINNO and M. JAROS L39

Kinetics of distant-pair recombination III. Bias illumination and frequency-resolved spectroscopy
By D. J. DUNSTAN 111

Extraordinary defects on hyperbolic tessellations. A contribution to the structural description of covalent glasses
By M. KLÉMAN and P. DONNADIEU 121

The transport properties of boron-doped amorphous silicon and their interpretation
By F. GHIASSY, D. I. JONES and A. D. STEWART 139

Observation of correlation effects in the hopping transport in amorphous silicon
By V. VOEGELE, S. KALBITZER and K. BÖHRINGER 153

The pre-exponential factor in the conductivity of liquid semiconductors
By N. F. MOTT 169

Conductivity near a mobility edge (II)
By N. F. MOTT and M. KAVEH 177

Refractive index of molten sulphur
By A. DONALDSON and A. D. CAPLIN 185

Electrical properties and ESR of undoped microcrystalline Si with a preferential orientation
By S. HASEGAWA, K. KISHI and Y. KURATA 199

Book reviews 211

NUMBER 3—SEPTEMBER

PART A

Letters Section:

***In situ* HREM observation of solid–liquid interface**
By H. SAKA, A. SAKAI, T. KAMINO and T. IMURA L29

PAGE

The sites of premelting
By F. J. BARTIS L33

Measurement of foil thickness and extinction distance by convergent beam transmission electron microscopy
By F. R. CASTRO-FERNANDEZ, C. M. SELLARS and J. A. WHITEMAN 289

Calculation of defect migration energies using molecular dynamics
By C. C. MATTHAI 305

Low-dose neutron irradiation damage in copper. I. Vacancy loop production
By J. W. MUNCIE, B. L. EYRE and C. A. ENGLISH 309

The effect of climb motion on the dislocation bias during irradiation
By H. RAUH and R. BULLOUGH 333

Effects of non-stoichiometry on the high-temperature deformation of Ni_2AlTi
By Y. UMAKOSHI, M. YAMAGUCHI and T. YAMANE 357

High resolution structure imaging and image simulation of stacking fault tetrahedra in ion-implanted silicon
By W. COENE, H. BENDER and S. AMELINCKX 369

The velocity of dislocation-related evaporation steps on (100) surfaces of NaCl
By H. Z. DURUSOY and Z. A. MUNIR 383

Helical dislocations in Sn-doped GaP epitaxial layers and their characterization by transmission electron microscopy
By G. WAGNER and V. GOTTSCHALCH 395

Theoretical study of phase contrast images for small coherent precipitates inside a matrix
By G. NIHOUL and A. CHARAI 407

Crystallographic orientation of a recrystallized grain grown in a strained single crystal of ice
By M. OHTOMO and G. WAKAHAMA 419

PART B

Editorial vi

Appreciations 215

Thermoelectric power of amorphous silicon and germanium
By J. STUKE 225

Dopant and defect states in a-Si:H
By R. A. STREET, D. K. BIEGELSEN, W. B. JACKSON, N. M. JOHNSON and M. STUTZMAN 235

PAGE

Transient mobility and lifetime studies in amorphous silicon and their interpretation
By W. E. Spear and P. G. Le Comber 247

Tail-state distribution and extended-state mobility in a-Si:H
By E. A. Davis, H. Michiel and G. J. Adriaenssens 261

Photoluminescence properties of a-SiN_x:H alloys
By I. G. Austin, W. A. Jackson, T. M. Searle, P. K. Bhat and R. A. Gibson 271

Gap states in hydrogenated amorphous silicon. The origins of the light-induced ESR and the low-energy luminescence
By K. Morigaki and M. Yoshida 289

Thermostimulated conductivity in amorphous semiconductors
By H. Fritzsche and N. Ibaraki 299

Optical modulation spectroscopy of amorphous semiconductors
By J. Tauc and Z. Vardeny 313

Comparative study of amorphous Ge and amorphous GaAs
By M.-L. Theye and A. Gheorghiu 325

Infra-red effective charges for amorphous, monoclinic and trigonal Se
By G. Lucovsky and C. K. Wong 331

Photo-induced structural and physico-chemical changes in amorphous chalcogenide semiconductors
By A. E. Owen, A. P. Firth and P. J. S. Ewen 347

The coordination of impurities in chalcogenides. A neutron diffraction study
By J. E. Enderby and A. C. Barnes 363

Defect mechanisms in a-SiO_2
By J. Robertson 371

Electronic charge transport in high-resistivity semiconductors
By H. K. Henisch, J.-C. Manifacier and Y. Moreau 379

Very slow relaxation in systems lacking translational symmetry, with emphasis on disordered insulators
By M. Pollak and A. Hunt 391

Si:P revisited. Electronic structure observed by magnetic resonance
By D. Jerome, C. Ryter, H. J. Schulz and J. Friedel 403

PAGE

Comments on the thermodynamic properties near the metal–insulator transition in Si:P
By T. M. RICE 419

Hopping conduction in phosphorus-doped silicon
By W. SASAKI 427

Quantum corrections and the metal–insulator transition as a function of dimensionality in the GaAs impurity band
By D. J. NEWSON, C. MCFADDEN and M. PEPPER 437

The zero-temperature d.c. conductivity versus density and the metal–insulator transition in some heavily doped semiconductor systems
By K.-F. BERGGREN and B. E. SERNELIUS 459

Equation of state for a conduction-electron gas near the Mott transition
By J. V. ACRIVOS 471

Critical exponent of the metal–insulator transition
By G. A. THOMAS 479

Dielectric studies of the approach to the insulator–metal transition in fluid mercury
By F. HENSEL, M. YAO and H. UCHTMANN 499

The question of classical localization. A theory of white paint?
By P. W. ANDERSON 505

The density of states in the Coulomb gap
By J. H. DAVIES 511

Power-law localization in two-dimensional systems. Theory and experiment
By M. KAVEH 521

Coulomb effects in the Anderson-localized insulating regime
By H. KAMIMURA 541

Diffusion in a random magnetic field
By S. F. EDWARDS 573

A preliminary study of magnetic phase transitions in the praseodymium–neodymium alloys
By H. H. BOGHOSIAN and B. R. COLES 579

Structure and physical features of the rare-earth borides
By J. ETOURNEAU and P. HAGENMULLER 589

PAGE

Localization in the Peierls gap
By P. C. KLIPSTEIN, R. H. FRIEND and A. D. YOFFE 611

Charge-density-wave instabilities in the low-dimensional molybdenum bronzes and oxides
By C. SCHLENKER, J. DUMAS, C. ESCRIBE-FILIPPINI, H. GUYOT, J. MARCUS and G. FOURCAUDOT 643

Bipolarons and superconductivity
By B. K. CHAKRAVERTY and J. RANNINGER 669

The superconductor–semiconductor transition in the $Li_{1+x}T_{2-x}O_4$ spinel system
By M. R. HARRISON, P. P. EDWARDS and J. B. GOODENOUGH 679

Dehybridization transition in intermetallic transition-metal compounds
By M. WEGER 701

The diffusion of ions with multiple valence. The oxidation of transition metal alloys
By A. M. STONEHAM and M. J. L. SANGSTER 717

Oxidation at low temperatures
By F. P. FEHLNER 729

A theory for the intensities of inelastic electron-tunnelling spectra
By W. A. PHILLIPS and C. J. ADKINS 739

Electron beam ionization damage processes in p-terphenyl
By A. HOWIE, F. J. ROCCA and U. VALDRE 751

Indentation plasticity and polarity of hardness on {111} faces of GaAs
By P. B. HIRSCH, P. PIROUZ, S. G. ROBERTS and P. D. WARREN 759

Thermally activated dislocation glide in moderately concentrated solid solutions
By F. R. N. NABARRO 785

Statistical crystallography. Structure of random cellular networks
By N. RIVIER 795

NUMBER 4—OCTOBER

PART A

Positron annihilation study of lattice defects and phase transitions in tin
By P. C. RICE-EVANS, M. MOUSSAVI-MADANI, F. A. R. EL KHANGI and K. U. RAO 431

Martensitic phase transformation in A15 and Laves-phase compounds studied by internal friction
By C. L. SNEAD, JR and J. F. BUSSIÈRE 441

Effect of anisotropy on the electron-microscope images of dislocations in cubic crystals
By V. I. NIKOLAICHICK and I. I. KHODOS 451

PAGE

Atomistic model calculations of pipe-diffusion mechanisms in MgO
By J. RABIER and M. P. PULS 461

Thermodynamics of multiphase systems. A treatment of closed systems with homogeneous free-energy functions
By J. P. HOLLOWAY and J. F. STUBBINS 475

Evidence for a mechanism of swelling variation with composition in irradiated Fe–Cr–Ni alloys
By E. H. LEE and L. K. MANSUR 493

Stress orientation of nitrogen during the quench-aging of nitrogen ferrite
By P. FERGUSON and K. H. JACK 509

Bombardment of α-quartz and related materials by argon (3 MeV) ions
By F. G. KARIORIS, K. RAMASAMI, K. A. GOWDA and L. CARTZ 525

Dislocation-controlled precipitation of TiC particles and their resistance to coarsening
By W. KESTERNICH 533

The plastic deformation and hardness contours of phosphor-bronze cones
By M. M. CHAUDHRI, and J. E. GILBERT 549

Flaw statistics and the influence of non-linear deflections on the bending strength of brittle beams
By K. KENDALL 561

Deformation twinning in the intermetallic compound Cu_2Sb
By A. T. PAXTON and A. R. ENTWISLE 573

PART B

Letters Section:

The effects of optical irradiation and ion bombardment on amorphous tellurium
By R. T. PHILLIPS and A. D. YOFFE L45

Knight shift in metallic Si : P
By J. R. MEYER, F. J. BARTOLI and N. F. MOTT L51

The small-length-scale behaviour of an Anderson insulator and the question of 'resistivity saturation'
By S. SHAFT and Z. OVADYAHU L57

Field-ion microscope atom probe studies of metallic glasses
By A. R. BHATTI, B. CANTOR, D. S. JOAG and G. D. W. SMITH L63

Comment on 'On the temperature dependence of electron transport by small-polaron motion' by C. M. Hurd
By D. EMIN L71

PAGE

The decay rate of transient photocurrents in semiconductors
By V. HALPERN L75

Ultrasonic study of tunnelling defects in amorphous Se, Ge and Se-Ge compounds
By J. Y. DUQUESNE and G. BELLESSA 821

Deep electron traps in As_2Se_3 single crystals studied by photoconductivity and TSC measurements
By G. BRUNST and G. WEISER 843

Transient-photocurrent study of localized states at the conduction-band edge of a-Si:H
By H. OHEDA 857

A TEM study of the crystallization of amorphous $Ni_{67}Zr_{33}$ alloy. I. Metastable phases formed during crystallization
By Y. X. GUO, Z. K. HEI, Y. K. WU and K. H. KUO 869

Non-isothermal carrier transport in a solid with monoenergetic trapping level
By W. TOMASZEWICZ 881

Anisotropic superparamagnetic behaviour in textured ferrofluid systems
By U. HARTMANN and H. H. MENDE 889

Resonant Raman scattering with gamma rays
By S. MANNINEN, N. G. ALEXANDROPOULOS and M. J. COOPER 899

Non-equilibrium effects on the electric and magnetic properties of the Mo-chain compound Mo_2S_3
By A. K. RASTOGI 909

Book reviews 921

NUMBER 5—NOVEMBER

PART A

Letters Section:

Permissible values of vacancy flow factor and ratio of impurity diffusion coefficient to solvent self-diffusion coefficient in b.c.c. metals
By Y. IIJIMA, S.-I. USHINO and K.-I. HIRANO L37

Craze plasticity in a series of polystyrene/polybutadiene di-block copolymers with spherical morphology
By C. E. SCHWIER, A. S. ARGON and R. E. COHEN 581

Platelet defects in natural diamond. I. Measurement of displacement
By P. HUMBLE, J. K. MACKENZIE and A. OLSEN 605

Platelet defects in natural diamond. II. Determination of structure
By P. HUMBLE, D. F. LYNCH and A. OLSEN 623

PAGE

Anomalous viscosity of Cs_xCsI_{1-x} molten alloys in the metallic composition range
By G. CHAUSSEMY, A. E. D. KADOUN, A. ELARBY-AOUIZERAT and J. DUPUY 643

Electron microscopic investigation of a V_5Si_3 needle-shaped precipitate in V_3Si (A15 structure)
By A. BEN LAMINE, F. REYNAUD, J. P. SÉNATEUR and Y. BOUAZRA 657

The interaction between a dislocation loop and a gas bubble
By B. BURTON 669

A model of the interaction between a dislocation and a sliding grain boundary
By K. J. KURZYDLOWSKI and A. GARBACZ 689

Transmission electron microscopy in MgO single crystals containing a high concentration of hydrogen
By M. S. CORISCO, R. GONZÁLEZ and C. BALLESTEROS 699

Grain boundary dislocation structures in symmetric [001] tilt boundaries in aluminum
By J. S. LIU and R. W. BALLUFFI 713

The role of dislocations in ultrasonic attenuation
By S. PERRING, R. L. SMITH, B. HUDSON and W. N. REYNOLDS 721

PART B

Domains and walls in thermotropic liquid crystalline polymers. An optical microscopy study
By A. M. DONALD, C. VINEY and A. H. WINDLE 925

Structural, optical and transport properties of sputtered hydrogenated amorphous silicon films in relation to Si–H bonding configurations
By J. DIXMIER, P. DEROUET, M. ESSAMET and M. LARIDJANI 943

Computer experiment on the electron-irradiation-induced crystalline–amorphous transition
By K. MAEDA and S. TAKEUCHI 955

Memory dependence of Barkhausen emission
By T. ERBER, J. L. PORTESEIL and P. MOLHO 963

Atomic relaxation and electronic structure of dilute alloys in the tight-binding approximation
By G. MORAITIS, B. STUPFEL and F. GAUTIER 971

Structural, optical and electronic properties of amorphous SiC : H alloys prepared by magnetron sputtering of silicon in methane–argon gas mixtures
By N. SAITO, T. YAMADA, T. YAMAGUCHI, I. NAKAAKI and N. TANAKA 987

PAGE

The transient photodecay process and its interpretation in the case of disordered single crystals of arsenic triselenide
By J. M. MARSHALL, R. P. BARCLAY, C. MAIN and C. DUNN 997

Soft TA modes and anharmonicity in cadmium telluride
By N. J. WALKER, G. A. SAUNDERS and J. E. HAWKEY 1005

Quantitative analysis of lithium in Al–Li alloys by ionization energy loss spectroscopy
By H. M. CHAN and D. B. WILLIAMS 1019

Thermodynamic quantities frozen-in upon vitrification of metallic alloys
By E. GARRONE and L. BATTEZZATI 1033

Book reviews 1047

NUMBER 6—DECEMBER

PART A

Letters Section:

Dislocations and their relation to the magnetic properties of Pd_2MnSn Heusler alloy
By T. KAMIYAMA, Y. MINONISHI, T. SHINOHARA and H. YAMAMOTO L43

A new icosahedral phase with $m\bar{3}\bar{5}$ symmetry
By Z. ZHANG, H. Q. YE and K. H. KUO L49

Tenfold twins in a rapidly quenched NiZr alloy
By W. J. JIANG, Z. K. HEI, Y. X. GUO and K. H. KUO L53

Comparison of convergent-beam electron diffraction methods for determination of foil thickness
By J. GLAZER, R. RAMESH, M. R. HILTON and M. SARIKAYA L59

Variation with voltage of fine structure in TEM. ⟨111⟩ Pole figure for cubic Dy_2O_3
By M. BEN SALEM, M. H. PISCHEDDA, B. YANGUI, G. NIHOUL and C. BOULESTEIX 729

Isotope effect for diffusion of cobalt in single-crystal α-titanium
By H. NAKAJIMA, S. ISHIOKA and M. KOIWA 743

Recoil numbers, particle densities and reaction yields in linear atomic collision cascades
By W. HUANG, H. M. URBASSEK and P. SIGMUND 753

The theory of mechanical limiting size of a stacking-fault tetrahedron
By BEN-LIN LIU 787

PAGE

Capillary equilibria of surfaces intersected by dislocations
By D. J. Srolovitz and S. A. Safran 793

Isochronal annealing study on n-irradiated single crystals and polycrystals of Mo
By S. V. Naidu, A. Sen Gupta and P. Sen 801

Thermoelectric voltage measurements and the determination of surface flash temperatures during sliding contact
By J. Glascott, F. H. Stott and G. C. Wood 811

Third-order elastic constants and acoustic-mode vibrational anharmonicity of cobalt
By Y. K. Yoğurtçu, G. A. Saunders and P. C. Riedi 833

Subject Index 847

Index of authors (with titles) 855

List of contents iii

PART B

Letters Section:
Relaxation processes of dynamic and static magnetization in ferromagnetic Ni
By Seung-Am Cho L81

Low-pressure oxidation of silicon stimulated by low-energy electron bombardment
By P. Collot, G. Gautherin, B. Agius, S. Rigo and F. Rochet 1051

Scaling properties and kinetics: Williams–Watts relaxations
By A. Le Méhauté, L. Picard and L. Fruchter 1071

A multiple-trapping model with optical bias
By R. Pandya and E. A. Schiff 1075

EPR studies of Gd as a probe of uranium intermetallic compounds and YbCuAl
By C. Larica and B. R. Coles 1097

Theoretical line profiles of auto-ionizing states
By J. M. Noras 1107

Below-gap primary photocurrent associated with correlated defects in hydrogenated amorphous silicon
By H. Okamoto, H. Kida, T. Kamada and Y. Hamakawa 1115

The Coulomb potential near the low-index surfaces of spinels
By W. Ebert and H. H. Kung 1135

PAGE

Absolute scale of thermoelectricity III
By R. B. ROBERTS, F. RIGHINI and R. C. COMPTON 1147

Random site–bond diluted system in the Ising model
By ZHEN-YA LI and CHUAN-ZHANG YANG 1165

Book reviews 1171

Subject Index 1175

Index of authors (with titles) 1183

Index of book reviews 1195
